

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

*Panicum commutatum*, Schultes (*P. nervosum*, Ell.), *P. sphaerocarpon*, Ell., *P. consanguineum*, Kth. (*P. villosum* and *angustifolium*, Ell.), *P. laxiflorum*, Lam., and *P. ramulosum*, Mx., in part.

In the first edition, *Andropogon maritimus* was included in *A. scoparius*, with which it is closely allied. It is, however, a well-marked species. Mr. Isaac Burk has collected this grass at Cape May, New Jersey, and specimens of it are in hand.

The gentlemen who, from the frequent mention of their names, seem to have been most active in the discovery of the plants enumerated in the Supplement are Dr. A. P. Garber (since deceased), Messrs. A. H. Curtiss and Charles Mohr and Dr. Gattinger. Credit is due the two first named for the discovery of the greater part of the 180 species found only in Florida.—F. L. S.

*Origine des Plantes Cultivées.* Par Alph. De Candolle. 8vo., pp. 377. Paris: Germer Baillière et Cie. 1883.

*Michigan Agricultural College. Report of the Professor of Botany and Horticulture for 1881 and 1882.* By Dr. W. J. Beal. 8vo, pamph., pp. 57.

**Proceedings of the Torrey Club.**—The regular meeting of the Club was held at Columbia College Tuesday evening, Jan. 9th, the Vice-President presiding.

The Herbarium Committee reported contributions to the herbarium from Messrs. Day and Britton.

The Librarian read the titles of the books and periodicals that had been received since the last meeting.

This being the Annual Meeting, the Treasurer presented his report for the preceding year.

*The New Jersey Flora.*—Mr. Britton exhibited specimens of *Rudbeckia speciosa* and *Senecio tomentosa*; the former found in Cumberland County, N. J., by Mr. Commons, and new to the State, and the latter found by the same gentleman at Cape May, and by Mr. C. A. Gross at Landisville.

*Albinism.*—White-flowered forms of *Habenaria psycodes*, *Sisyrinchium Bermudiana* and *Cirsium arvense* were shown by Prof. Day.

*New New York Stations.*—Mr. Willis gave Mt. Kisco as a station for *Potentilla fruticosa*, a plant new to the Westchester County flora. Mr. Britton reported a locality near East Chester, on the Boston Turnpike, as a new station for *Leontodon autumnale*.

*Officers.*—The following officers were elected for the present year: President, J. S. Newberry; Vice-President, Addison Brown; Recording Secretary, Arthur Hollick; Corresponding Secretary, Benjamin Braman; Treasurer, W. H. Rudkin; Editor, W. R. Gerard; Associate Editor, N. L. Britton; Librarian, N. L. Britton; Curator, P. V. Le Roy.

One corresponding member was elected.
